### DETAILED ACTION

1. Claims 1-27 are in the case. Claims 28 has been added by preliminary amendment. Claims 1-28 are pending.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-27 are rejected under 35 U.S.C. 101 because the claimed process is inoperable in producing the claimed products.

Or alternatively, claims 1-27 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

Please note that formula V is substituted at 3-position of the piperidinyl ring while the product VII is a 2-substituted compound. Under chemical mechanism delineation the reaction of V and VI is a nucleophilic substitution at the 3-methylene carbon by the OR<sup>2</sup> with X as the leaving group. It is unclear how a position isomerism occurs and how did such replacement resulting into a 2-alkoxymethyl compound.

3. Claim 28 is allowable since paroxetine is a 3-benzdioxomethylene substituted piperidinyl compounds yet process of making such compound by reacting CIPMA with sesamol-tetrabutyl ammonium salt was neither anticipated nor rendered obvious by the art of record.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure in showing the state of the art.
